Technical details	<p><i>Country:</i> Austria <i>Covered region(s):</i> Austria <i>Covered land type:</i> All <i>Dataset:</i> Points and Polygon <i>Map resolution:</i> N/A <i>Data type:</i> Soil database or GIS viewer <i>Included soil parameters:</i> N/A <i>Location data:</i> N/A</p>
Additional information	<p>This soil information system offers users to see most of Austria's information on soil characteristics. It integrates soil maps, data from environmental surveys, monitoring results and cadastral information. Users can view values of desired locations, but the dataset cannot be downloaded without a "special request". Raw data can be plead for and might be provided Free access of charge. Tables with location numbers and all point data are downloadable. The coordinates from surveyed points are rounded in order not to reveal the correct location to the public. The official language of the datasets is German.</p>
